Introduction

The Image/Upgrade Overview Document is intended to provide ctcLink users with a summary of the changes that will be made in the system as a result of the upcoming image or PeopleTools upgrade implementation. Oracle releases multiple PeopleSoft updates, called images, for each pillar every year. Each Image contains bug fixes and features that are important for PeopleSoft to work well. PeopleTools upgrades update the underlying framework of the system. There are minimal changes that are noticeable to the end users. Below is an overview of the changes that you can expect to see as part of this upgrade.
