Introduction

The Image/Upgrade Overview Document is intended to provide ctcLink users with a summary of the changes that will be made in the system as a result of the upcoming image or PeopleTools upgrade implementation. Oracle releases multiple PeopleSoft updates, called images, for each pillar every year. Each Image contains bug fixes and features that are important for PeopleSoft to work well. PeopleTools upgrades update the underlying framework of the system. There are minimal changes that are noticeable to the end-users. Below is an overview of the changes that you can expect to see as part of this upgrade.

Enrollment Accessibility Issues

Fixed the accessibility issues encountered in Fluid Enrollment.

1. Removed Aria-disable and the native disable and replaced the link with a label.
2. Give each checkbox a unique identifier by using arialabelledby to associate the class and / or description with the checkboxes.
3. Ensured link text is meaningful within context using aria-label
4. Updated the instruction used in Navigation to say to navigate to the Main Region

The image shows a list of status items, each with a diamond icon and the text 'In Progress'. A contrast playground overlay is visible on the right side of the list. The overlay has a black background and white text. It displays the text 'Elements Containing Text: 109' at the top. Below this, there is a button labeled 'hide contrast playground'. The main heading of the overlay is 'Contrast Playground:'. Below this, there is a prompt: 'Enter two hex color values to get the contrast ratio.' The overlay shows two color swatches: an orange one with the hex value '#f39c12' and a white one with the hex value '#ffffff'. To the right of these swatches, it displays the contrast ratio '= 2.19:1'. Below the ratio, there is a note: 'Arrow keys adjust brightness: ↑ lightens, ↓ darkens.' At the bottom of the overlay, there are two buttons: 'get 4.5:1 suggestion' and 'get 3:1 suggestion'.

Shopping Cart

Modified the term selection fluid page of Shopping Cart Fluid component to set the grid title in the summary attribute for accessibility properties instead of setting the title in the display title properties of the grid, so that the grid title which is hidden in the term selection page won't be treated as second header in the structure helper via accessibility mode.
